

Infrastructure Projects of the Loreto Region in the Peruvian Amazon.

Fernando Melendez Celis
Governor of the Region of Loreto

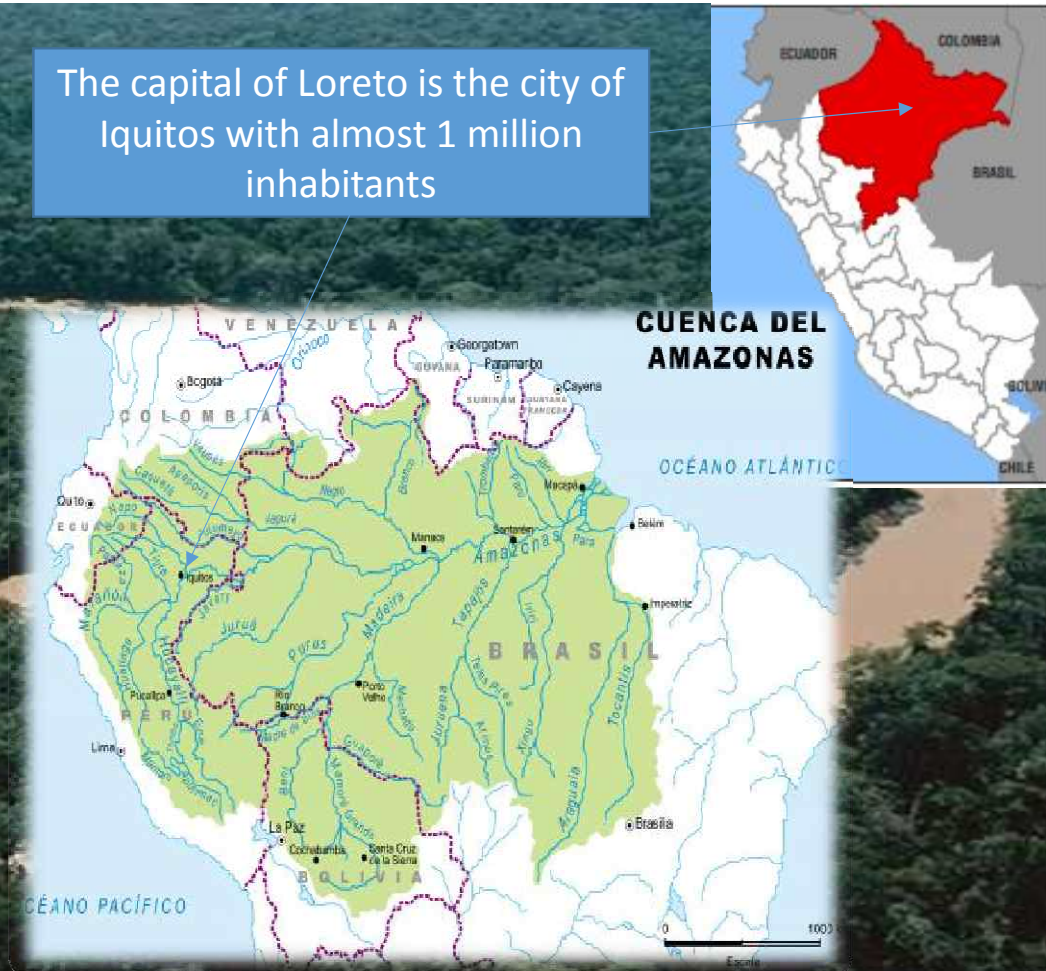

Seoul, September 2017

Loreto

- Peru is divided in 25 autonomous regions
- Loreto is the largest region of Peru, with 360,880 Km² (3.6 times the size of Korea 99,720 Km²)
- Loreto is located in the Amazon jungle
- Loreto is fully covered with rain tropical forests and crossed by majestic Amazon rivers
- Loreto has boundaries with Ecuador, Colombia and Brazil
- Loreto is a region with an exceptional biological diversity: it has the largest forest area of Peru, it has rich fish stocks and in its sub floor it has large oil reserves
- Loreto also has on its territory 31 indigenous peoples belonging to 15 linguistic families, which makes it the region with the highest cultural diversity of Peru.

The capital of Loreto is the city of Iquitos with almost 1 million inhabitants

Infrastructure Projects:

1. **Northeast Iquitos-Saramiriza Highway**
2. **Bellavista-Mazan-El Estrecho Highway**
3. **River Port of Saramiriza**
4. **International Port of Iquitos**
5. **Improvement of the Tourist Park of Quistococha**
6. **Pongo de Manseriche Hydroelectric Power Station**
7. **Saramiriza-San Lorenzo Highway**
8. **River Port of Nauta**
9. **River Port of San Lorenzo**
10. **Orellana-Huallaga Highway**
11. **Industrial Park of Iquitos**

Nor Oriental Iquitos - Saramiriza Highway

Objective

Promote the socio economic development of the Loreto Region

Summary

Construction of 700 km de of road with flexible pavement including works of art. The Project is highly economic attractive because the Region of Loreto will be for the first time connected with the rest o the country, generating a significant demand of loads and passengers. This project will be complemented by the Bellavista-Mazan-El Estrecho Highway connecting Peru with Colombia by road.

Estimated Investment

S/ 7.000.000.000,00 PEN (2.157.680.000,00 USD)

The Project will connect the Community of Huambe in Km 50 of the Iquitos-Nauta Road, with Santa Maria de Nanay (Nanay River), 12 de Octubre (Tigre River) – Andoas (Pastaza River) and Saramiriza (Marañon River).

Bellavista-Mazan-El Estrecho Highway

Objective

Promote the socio economic development of the Loreto Region

Summary

The Project will connect the Port of Bellavista Nanay in the city of Iquitos (Nanay River) with Santo Tomas, (Nanay River), Mazan-San Salvador (Napo River), El Estrecho (Putumayo River).

The works include the construction of 700 km of road with flexible pavement. The Project is highly economic attractive because the Region of Loreto will be for the first time connected with the rest of the country, generating a significant demand of loads and passengers. This project will be complemented by the Iquitos-Saramirza Highway connecting Iquitos with the Pacific Ocean and the Asian market.

Estimated Investment

S/ 1.128.900.260,00 PEN (347.951.771,13 USD)

Objective

Improve the river infrastructure of Loreto.

Summary

The International Port of Saramiriza is located in the Region of Loreto, Province Datem del Marañón, District Manseriche, on the banks of the Marañón river, in the town of Saramiriza.

The works include the construction of a wharf of 100,167 m² and a logistics operations area of 90,000 m².

This project is part of the regional competitiveness and connectivity policies promoted by the regional government, based on the multimodal axis that starts in Brazil and ends in Asia Pacific, taking advantage of the waterways of the Amazon, to communicate with the greater area production and trade potential of the world, comprising countries such as China, Japan, South Korea, Singapore, Hong Kong

River Port of Samiriza

Estimated investment

45. 000.000,00 PEN (13.875.300,00 USD)

 The Project will be located in the city of Saramiriza (on the Banks o the Marañón river), District of Manseriche, Province of Datem del Marañón, Region of Loreto

International Port of Iquitos

Objective

Improve the river infrastructure of Loreto

Summary

The works include the construction of a wharf of 120,167 m² and a logistics operations area of 383,367 m². In that sense, as part of the first phase, a dock with four berths, two berths for passengers, a storage area for cargo, a storage area for perishable merchandise and a container storage yard will be built.

The project will connect with the left bank of the Bellavista - Mazán - San Salvador - El Estrecho Highway

The International Port of Iquitos, is located on the banks of the Amazon River, in the town of Sinchicuy, province of Maynas, in the Loreto region; To the left margin downstream of the Amazon river, to scarce 20 minutes in boat slipper

Estimated Investment

320.000.000,00 PEN (98.668.800,00 USD)

Improvement of the Tourist Park of Quistococha

Estimated Investment

36,614,540.00 PEN (11.279.475,19 USD)

The Project will be located in the Community of Quistococha, San Juan District, Province of Maynas, Loreto Region

Objective

To provide adequate conditions of the public tourist services in the National Tourist Park of Quistococha, Iquitos.

Summary.

The Works will include:

A Zoo will, improving the facilities of the water areas, and proposals for animal exhibitions.

An Interpretation Centre, whose object will be nature, animal and plant life; as well as human activities that destroy the Amazon.

An Administrative area.

A Centre for Events and Exhibitions, allowing the concentration of mass activities.

A Recreation Area, with white sand beach.

Pongo de Manseriche Hydroelectric Power Station. 7,500 MW

Objective:

Generate renewable energy source.

Summary:

The project consists of the construction of a hydroelectric plant of 7,500 MW of power, damming the river Marañón in the area of the Pongo de Manseriche.

Components:

- Dam
- House of machines
- Turbines
- Generator
- Spillways
- Patio of keys
- Transformers
- Lines of transmission

Estimated investment

52.000.000,00 PEN (16.007.160,00 USD)

Location

Region Loreto, province Datem del Marañón, district Manseriche; And region Amazonas, province Condorcanqui.

Demand

The energy matrix of the country is constituted by 52% per source of thermal generation, which can be replaced by the energy generated by this project and the surplus can be exported to Brazil and Colombia.

Saramiriza-San Lorenzo Highway

Objective

The province of Datem del Marañón will be integrated by highways.

This project is a long dream of the population of the province of Datem del Marañón: They wanted always to be connected with the rest of the country via Saramiriza, in order to improve their quality of life.

Summary

108.3 km of paved road of a 6.60 meters wide walkway with two lanes, one for each direction of circulation of 3.30 meters.

Estimated Investment

464.418.066,00 PEN (142.961.813,26 USD)

River Port of Nauta

Objective

Improve the river infrastructure of the city of Nauta located in the banks of the Marañón river

Summary

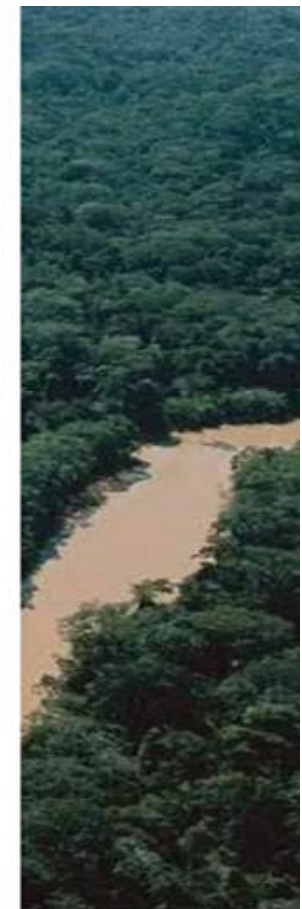

Construction of the fluvial port of transfer of load of high efficiency and performance. This river port will serve as a logistics center and will be equipped with the necessary port infrastructure to transfer cargo with high efficiency and performance.

Estimated investment

30.000.000,00 PEN (9.234.900,00 USD)

Objective

Improve the river infrastructure of Loreto.

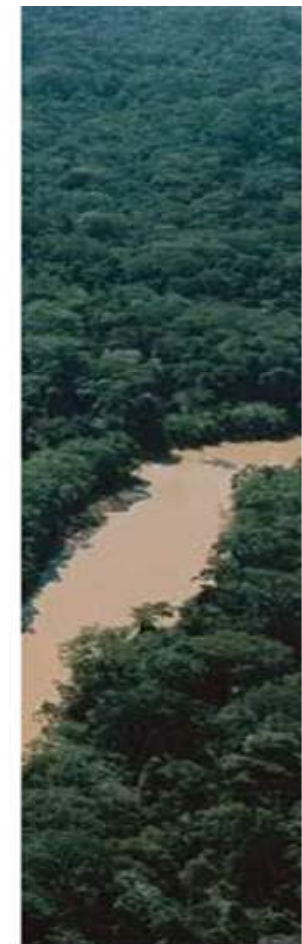

Summary

Construction of a cargo transfer river port on the left bank of the Marañón River, in the city of San Lorenzo. This river port will serve as a logistical center and will be equipped with the necessary port infrastructure to transfer cargo.

River Port of San Lorenzo

Estimated Investment

30.000.000,00 PEN (9.234.900,00 USD)

Orellana - Huallaga Highway

Objective

To promote terrestrial connectivity between the Ucayali and Huallaga river basins.

Summary

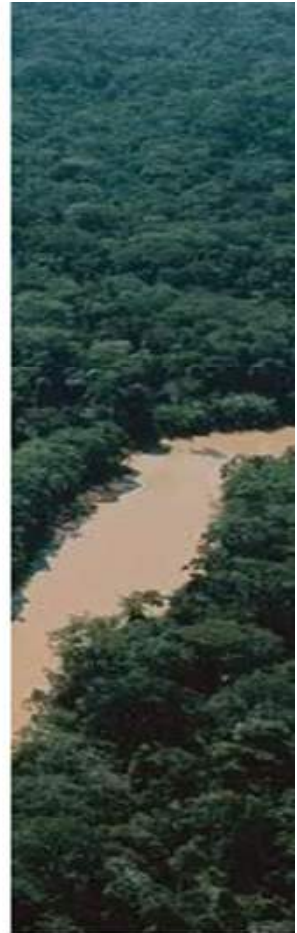

To build the Orellana-Huallaga Highway, comprising a 135-kilometer road linking the Ucayali and Huallaga river basins, linking the city of Orellana (in the Ucayali river), capital of the district of Vargas Guerra, Loreto Region, with the locality of Pongo Island (in the Marañon river) in the district of Huimbayoc, region of San Martin.

Estimated investment

150.000.000,00 PEN (46.174.500,00 USD)

Industrial Park of Iquitos

Objective

Promote production activities with added value in order to take advantage of Loreto's natural resources.

Summary

The project will built an Industrial Park of 90 hectares in the community of Sinchicuy, city o Iquitos, with the following facilities:

Loaded and cleaned lots

Road infrastructure

Basic sanitation of water and drainage

Electricity

Internet

Estimated investment

65.000.000,00 PEN (20.008.950,00 USD)

Demand

Enterprises located inside and outside the Loreto region, mainly the Medium and small enterprises.
